Dear Hiring Manager,

I am writing to express my strong interest in the DevOps internship position at Oracle. As a fifth-year Network and Telecommunications Engineering student with hands-on experience in software development and DevOps practices, I am excited about the opportunity to contribute to Oracle's innovative teams.

My technical skills and project experiences align well with the DevOps field:

- I have practical experience with CI/CD pipelines, having automated build, test, and deployment processes in previous projects. This experience would be valuable in Oracle's DevOps environment.
- My proficiency in technologies such as Angular, Next.js, Spring Boot, and MySQL demonstrates my ability to work across the full stack, which is crucial in DevOps roles.
- I've developed several applications, including an e-commerce platform and HR management systems, showcasing my ability to build and maintain complex software systems.
- My experience with GitHub and Git for version control is essential for collaborative development and code management in DevOps.

I'm particularly drawn to Oracle because of its leadership in cloud technologies and enterprise software. The opportunity to work with cutting-edge tools and contribute to solutions that impact businesses worldwide excites me. Oracle's commitment to innovation in areas like cloud infrastructure and database management aligns perfectly with my career aspirations in the DevOps field.

Thank you for considering my application. I am eager to bring my technical skills, passion for learning, and dedication to Oracle's team. I look forward to the possibility of discussing how I can contribute to Oracle's DevOps initiatives.

Sincerely,

EL OIDII ABDESSAMAD
