Mrs. Aïda Oualalou
Head of Business
inyad
Casablanca-Settat
Morocco

Dear Mrs. Oualalou,

I am writing to express my strong interest in the Java Full Stack Engineer Intern position at inyad. As a fifth-year Telecommunications and Networks Engineering student with practical experience in software development and a strong foundation in Java and Spring Boot, I am excited about the opportunity to contribute to inyad's mission of building the leading tech platform for small and micro merchants in Africa.

Your commitment to innovation and the impressive reach of serving over 5M merchants across 15 countries particularly appeals to me. My experience developing microservices-based applications and e-commerce platforms aligns well with inyad's technical requirements. During my internship at RysaSoft, I worked on an HR management platform, and at HARK TRANS, I developed a Java-based logistics management system. These experiences have honed my abilities in building scalable applications and working with databases, which are crucial skills for this role.

I am particularly drawn to inyad's culture of testing, learning, and breaking new ground. My project experience with Nuntium, where I architected a microservices ecosystem using Spring Boot and implemented CI/CD pipelines, demonstrates my ability to work with modern technologies and deliver scalable solutions. I am confident that my technical skills, combined with my eagerness to learn and create value, make me an excellent candidate for this position.

I would welcome the opportunity to discuss how I can contribute to inyad's mission and growth. Thank you for considering my application. I look forward to speaking with you about this opportunity.

Sincerely yours,

EL OIDII ABDESSAMAD
